03

Vermicompost

It is a nutrient-rich soil conditioner, enhancing soil structure, aeration, and water retention

04

Cow Dung

Cow dung manure is an organic fertilizer made from the decomposed excreta of cows.

05

Poultry Manure

Poultry manure is an organic fertilizer made from the droppings of chickens, ducks, or other poultry.

1. PALLETS 2. GRANULES

06

Micro Biomil

Micro Bio mil is our high-quality organic fine powder fertilizer, designed for easy and even broadcasting across your fields.

07

Liquid Manures

Organic liquid manures provide a nutrient-rich, eco-friendly solution that enhances soil health and boosts plant growth, making them ideal for sustainable farming.

6. HYMIC ZYME 08

7. CROP TONIC 10

Vermicompost :

HSN Code : 31010099

Vermicompost is a nutrient-rich soil conditioner, enhancing soil structure, aeration, and water retention. It is a nutrient-rich soil conditioner, enhancing soil structure, aeration, and water retention.

Key Benefits of our Vermicompost:

- **Nutrient Content:** Contains essential nutrients like Nitrogen, Phosphorus, Potassium (NPK), along with micronutrients, enzymes, and beneficial microorganisms.
- **Eco-friendly:** Vermicomposting recycles organic waste, reducing landfill use and lowering greenhouse gas emissions.
- **Improves Soil Health:** Enhances microbial activity and promotes the growth of healthy plants. It Stimulates root development and increases crop yield and quality.

- **Packaging :** Standard Packing : 50 kg, 40 kg PP/HDPP bags
(Customisable Packaging available)

Cow dung Manure :

Cow dung manure is an organic fertilizer made from the decomposed excreta of cows. It is a traditional and widely used natural soil amendment in farming.

Key Benefits of our Cow Dung Manure:

Nutrient-Rich: Contains essential nutrients like Nitrogen, Phosphorus, Potassium (NPK), as well as micronutrients that are vital for plant growth.

Soil Conditioner: Improves soil structure, enhances water retention, and promotes better aeration.

Sustainable Farming: Supports organic farming practices by recycling animal waste into valuable organic matter.

- **Packaging :** Standard Packing : 50 kg, 40 kg PP/HDPP bags
(Customisable Packaging available)

Poultry Manure :

Poultry manure is an organic fertilizer made from the droppings of chickens, ducks, or other poultry. It is one of the most nutrient-rich animal manures, making it highly effective for improving soil fertility.

Key Benefits of our Poultry Manure:

- **Nutrient-Dense:** Rich in Nitrogen, Phosphorus, and Potassium (NPK), along with other essential micronutrients that support robust plant growth.
- **Organic Matter:** Adds valuable organic matter to the soil, improving soil structure, moisture retention, and aeration.
- **Rapid Release:** Nutrients are quickly available to plants, making it effective for fast-growing crops.

Available in 1) Pallets and 2) Granules form

- **Packaging :** Standard Packing : 5Kg, 25Kg, 40 kg 50 kg PP/HDPP bags.

(Customisable Packaging available)

Micro Biomil: High Quality Organic Manure

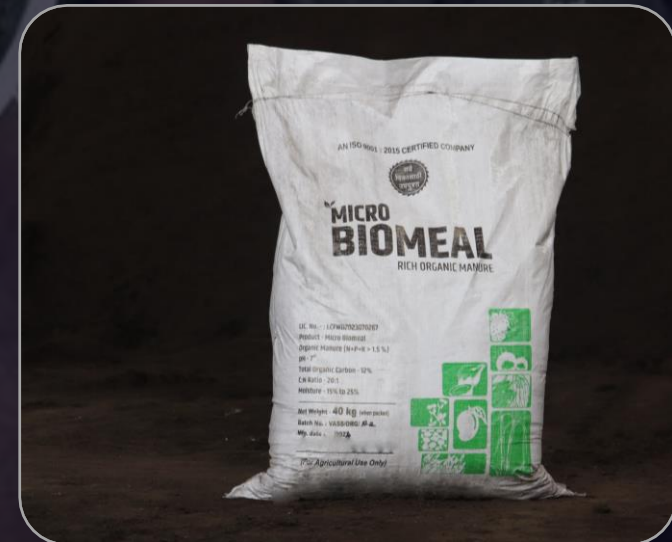

HSN Code : 31010099

Micro Biomil is our high-quality organic fine powder fertilizer, designed for easy and even broadcasting across your fields. Made from carefully selected natural ingredients, it provides essential nutrients which are PRIMARY, SECONDARY and MICRO NUTRIENTS to enrich your soil and promote healthy plant growth.

The micro-fine texture ensures uniform distribution, while the organic composition supports sustainable, eco-friendly farming practices. Micro Biomil is a versatile solution for boosting crop yields and maintaining soil fertility.

LIQUID MANURES

- I. HYMIC ZYME [Humic Acid]
- II. CROP TONIC [Perfect Growth Promoter]

All Clear: A Perfect Growth Promoter

HSN Code : 31059090

- Improves Metabolism of crops.
- The rate of Photosynthesis increases.
- Nutrients in the soil become available to the crop

- Stops Drooping of fruits and flowers.
- Improves the Quality of flowers and fruits etc.
- Increases the life Span of crops.
- Can be used with any Insecticides, Fungicides And Fertilizers.

Humic Zyme: Organic Humic Acid

HSN Code : 380899990

- Increases crop quality & yields.
- Regulates the pH-value of soils.
- Stimulates white root growth, enhance better uptake of nutrients
- Promote the conversion of nutrient elements into available forms to plants.
- Improve the structure of the soil, prevent high water and nutrient losses in light or sandy soils
